

PDF Master Pro — Official Test Document

Created by Mr Nazish Alfanso

Welcome to the next generation in-browser PDF Editing Suite.

This document contains real text streams designed to test direct text editing, layout preservation, font size matching, color detection, and page manipulation.

Section 1: Direct Text Editing Capabilities

1. Click on any text in this document to edit it directly in place.
2. Modify text strings, alter fonts, change sizes, or delete obsolete paragraphs.
3. Add new text boxes anywhere with customizable styling and unicode support.

Important Note: Original document layout and geometry are preserved precisely.

Page 2: Advanced Annotation & Page Tools

This page demonstrates support for multi-page documents:

- Draw freehand sketches, underlines, highlights, and strikethroughs.
- Sign documents digitally with your custom signature pad stamp.
- Insert images, geometric shapes, arrows, and highlight key terms.
- Reorder, rotate, delete, or extract pages effortlessly from the sidebar.

Hindi & Unicode Support: ■■ ■■ ■■■■■■■■■■ ■■■■ ■■■■■■ ■■■■■■■■ ■■ ■■■■ ■■ ■■■■ ■■ ■■■■
